

As part of our month-long celebration of Earth Day, Rooster Springs is conducting a paper drive. Our goals are to fill both of the Paper Retriever® Bins; raise awareness of what types of paper can be recycled through this service; and raise money for our school.

The 5th Grade Green Team will weigh the paper collected in each classroom each week during the drive and post the results on the Planet Protectors bulletin board across from the music room. Adult volunteers take the paper collected within the school to the Paper Retriever® Bins in the north parking lot each week. Encourage your neighbors and friends to save their paper and drop it in either of the yellow and green dumpsters.

The Paper Retriever® Bins accepts the following types of paper:

Newspaper

Magazines

Catalogs

Old/Unwanted Mail

Office and School Papers

Bagged Shredded Paper

Please no cardboard, phone books or chipboard (cereal or beverage containers).

Earth Day Facts

Every ton of recycled paper conserves 3 cubic yards of landfill space, saves 4,000 kilowatts of electricity, 7,000 gallons of water, almost 4,000 gallons of oil and reduces your organization's carbon footprint. Start recycling today!
